

Executive summary

Marketing Funnel

The sheet provides an overview of marketing campaign performance, comparing total spend, attributed revenue, leads generated, and ROI across multiple campaigns.

- Total campaign spend of \$16.56M vastly exceeds total attributed revenue of \$1.47M, resulting in negative ROI across all campaigns.
- Q3 Growth Sprint is the worst performer with the highest spend at \$5,436,854.91 and an ROI of -5,142,997.84, while Enterprise Expansion performs best at -991,709
- NovaPulse Launch leads in revenue generation at \$546,259.39, whereas NovaEdge Awareness generated only \$21,940.40 despite \$2,126,907.91 in spend.
- Only 85 total marketing leads were captured, with an average campaign response rate of 0.24.

Sales Pipeline

The sheet provides an overview of the sales pipeline performance, highlighting total pipeline value, average deal size, and deal win rates.

- The total pipeline value stands at 4.54M, representing the combined worth of all deals in the pipeline.
- The average deal size is 1.45K, indicating relatively modest individual deal values compared to the overall pipeline.
- The average deal win rate is 0.55, meaning approximately 55% of deals are successfully closed, suggesting a moderately healthy conversion rate.

Customer Health

The sheet provides an overview of customer support operations, tracking complaint volumes, ticket trends, resolution times, and customer sentiment across product areas.

- Out of 152 total support tickets, the majority (99) reflect neutral customer sentiment, while negative tickets (29) outnumber positive ones (21).

- Notifications is the top driver of support demand with 806 tickets, far exceeding Billing at just 164 tickets.
- The average resolution time of -1.79 days suggests a data quality issue warranting further investigation into the underlying calculation methodology.
- The average support ticket volume over the last 30 days stands at 3.31, alongside 20 total customer complaints.
